500+ participants from **ca. 300** companies and organisations

Organisations from different industries, such as Mobility, Energy, Manufacturing, Finance etc.

Large Companies

SMEs

Start-Ups

Universities

R&D

Associations

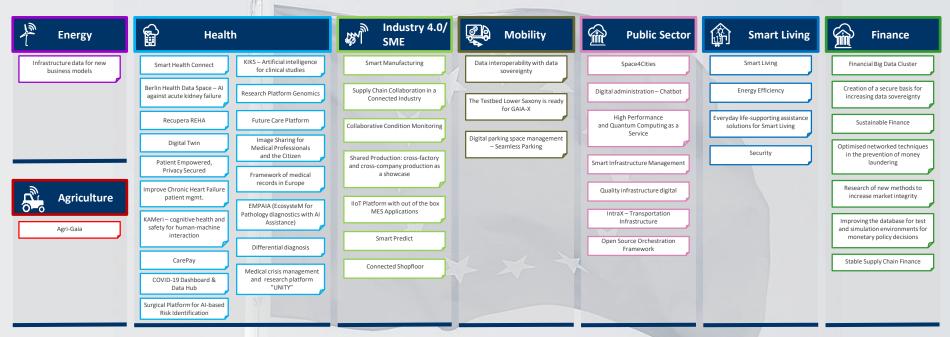

Public Sector

Embracing Domains and User Perspectives

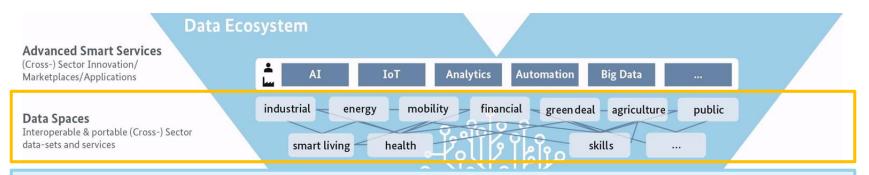

8 Domains and 42 Use Cases are Involved

The domains match the data spaces from the European Data Strategy

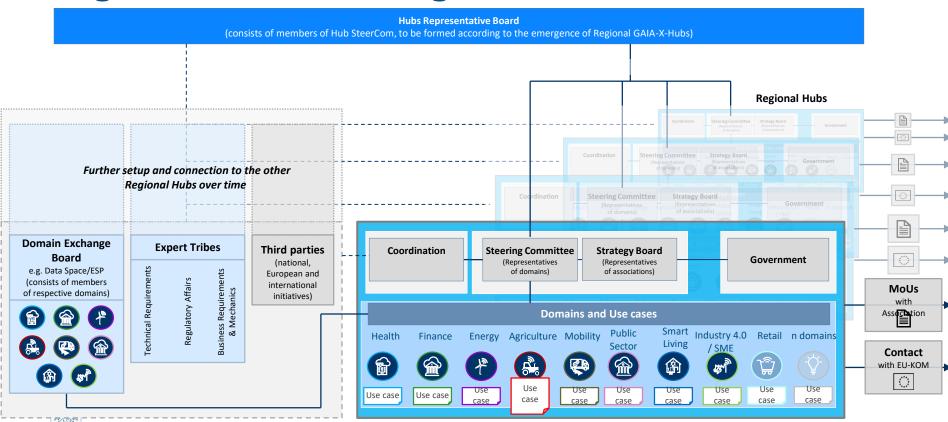

User requirements are at the core of the development of GAIA-X

- In order to facilitate value creation based on digital services and mechanisms, we need an architecture in the form of an underlying framework common to all domains.
- GAIA-X allows the emergence of Advanced Smart Services such as AI, Analytics or Big Data and fosters innovation in the GAIA-X Ecosystem.
- GAIA-X offers ontologies for interoperability and API within and across sector specific data spaces according to the EU data strategy.
- It promotes the opportunity to collaborate in data-driven horizontal and vertical value chains.
- As a result, it encourages the emergence of sustainable business and innovation ecosystems for the next generation of digital infrastructure.

Organisation of the Regional GAIA-X-Hubs

GAIA-X

Example: German Hub

We invite all interested parties to become a part of the Federated GAIA-X Ecosystem.
